

BRBC'S M Clinic was organized on 05 April 2019 at IKP Eden, Bangalore, as a part of the Mentor Mixer on Fund raising and business development for Med-Tech startups. The clinic presented an opportunity for one on one discussion between entrepreneurs and mentors.

Mentor: Anand Govindulari

Participant	Focus area
Nasera Rizwana	Focused on developing Regenerative Medicine (RM) kits for various medical ailments – have designed an oral RM kit for dental caries problem, a drug band for wound healing (which falls in the category of targeted drug delivery in RM)
Shekhar Jain	Medical product innovation

Mentor: Kailash Nath

Participant	Focus area
Abhay Tanksali	Active Fecal management device for bed ridden patients (ICU) and ageing elderly (at home)
Hariprasad Rao	Design, development and manufacture of Endosseous Dental Implants.
Ravikumar Rajendraprasad	Non invasive detection of blood parameters using NIR based approach and initial product line is based on blood glucose profiler.

Mentor: Ravi Sarangpani

Participant	Focus area
Hariprasad Rao	Design, development and manufacture of Endosseous Dental Implants.
Abhay Tanksali	Active Fecal management device for bed ridden patients (ICU) and ageing elderly (at home)
Sivaprasad Enugula	IOT Smart CPR is integrated with the mechanical CPR and AED along with IOT which increases the survival rate for heart stroke patients by providing high quality CPR and early care.

Mentor: Srikant Sastri

Participant	Focus area
Sivakumar	Develop an affordable interactive gait trainer for cerebral palsy and other associated disability.
Kumaraguru Muthuswamy	Ista Healthcare manufactures medical compression stockings for several conditions like Deep vein Thrombosis (DVT), Pulmonary Embolism, Varicose veins, Lymphoedema etc.
Nibedit Dey	Product: An intelligent pneumonia screening device. Focus: Public Health

Mentor: Amitabh Shrivastava

Participant	Focus area
Shekhar Jain	Medical product innovation
Sivaprasad Enugula	IOT Smart CPR is integrated with the mechanical CPR and AED along with IOT which increases the survival rate for heart stroke patients by providing high quality CPR and early care.
Mujitha Bai K B	<p>Company Focus:</p> <p>1) Platforms for Remote Discovery, Monitoring, Integrated Health Management and End-to-End Evidence Management - with human systems approach</p> <p>2) Comparative Effectiveness Research (CER) and Patient-centered Outcomes Research (PCOR)</p> <p>Current Product Focus: Remote Monitoring & Personalised, Person-centric, Integrative Healthcare for Pain Management and Supportive/Palliative Cancer care</p>

Mentor: Rema Subramanian

Participant	Focus area
Pranav Chopra	SphinX, is an ostomy management device that will enable continence for colostomates and ileostomates. A soft and pliable insertable port, SphinX provides a safe, secure and discreet solution to stoma management while restoring continence to the patient. A SphinX port is replaced every 28 days, and does not need supporting accessories such as adhesives, belts etc. It also eliminates bag associated skin excoriations.
Pillalamarri Sridhar	Extend specialized care for patients at home needing Palliative/ Supportive through clinical telepresence and related medical services
Yeshpal Mathangi	Oral Medical device with controlled drug delivery

Mentor: Premnath Venugopalan

Participant	Focus area
Antony Aneel	We are a medical device company getting ready to launch world's first and only non invasive blood glucose instrument
Suruchi Rao	We, at Ossus Biorenewables, are a Bengaluru based bioenergy start-up, creating a sustainable circular economy, from wastewater. Our proprietary technology, termed OB bH2 Plus Biorefinery, is a continuous process that generates carbon-free clean energy and recovers value-added chemicals, allowing for the valorisation of wastewater.
Srinivas Azad Topalle	We are developing UAVs for Emergency Medical Response, to carry life-saving supplies to patients/remote locations before an ambulance can reach, so that survival rate increases.
