

BRBC'S M Clinic was organized on 01 Dec 2018 at Venture Center, Pune, as a part of the Mentor Mixer on Agriculture Technology. The clinic presented an opportunity for one on one discussion between entrepreneurs and mentors.

Mentor: Srikant Sastri

Participant	Focus area
Mrutunjaya Sahu	Product for increasing water quality to improve aquaculture yield, to improve sediment health of aqua-systems.
Chellam Sankaran	Setting up an automation equipment platform for Agriculture needs involving precision Agriculture using sensors and IOT technologies and robotics.
Harit	

Mentor: M V Shankar

Participant	Focus area
Vishal Mahale	Developing food analysis solutions
Heramb Rahalkar	Developed Nano meter particle size (NMPS) colloidal Minerals, Poly unsaturated fatty acid (PUFA) as plant nutrition / energy supplement and NMPS colloidal Silver & Copper as oligodynamic immunomodulators.
Prasanna Waichal	LED Lighting for plant growth, UV sensors, UV illumination light sources
Aditya Kabra	

Mentor: Prashant Rao

Participant	Focus area
Sanket Kedar	Developing Farm Intelligence System (FIS). The Farm analytics with help of on-farm data will make farmer more independent from inefficiencies; generic knowledge etc. and he will be more self-dependent with the help of FIS.
Vaibhav Thacker	KrishiBOT is focused on increasing the precision in farming for various processes like sowing seeds, fertilizer and pesticide spraying, weed removal and preliminary soil testing with the help of technology.
Amol Pacharne	Ready to eat Nutrient rich super foods.

Mentor: Paritosh Segal

Participant	Focus area
Sunil Kasat	New methods to give more fresh flour which includes wheat, bajra, jowar, ragi to clients. Also want to work on supply chain to preserve the natural harvest cracked of the grains.
Abhay Shendye	Swasti has, developed non toxic (under patenting), biotechnology products, which empower the farmers to mitigate risk caused by crop diseases. Swasti's three pronged program "BioAvert I" gives preventive solutions in the form of blocking pathogen entry, increasing beneficial microbes and stimulating plant defense mechanism.
Renuka Karandikar	SNIPR tech based next gen Ag biologicals
Vishal Sardeshpande	

Mentor: Robesh Maity

Participant	Focus area
Jasveer Singh	Smart Irrigation
Sai Gole	LeanAgri is developing activity planning and decision making platform for farmers for different set of decisions like nutrient management, pest and disease management and irrigation management. These precise activity planning is done on the basis of data from the farm and is communicated to farmers using different communication channels like SMS, IVR calls and mobile application.
Mangesh Khadase/Shubham Singh	
Jijo John Issac	The focus of the startup is in food protein technology namely - Protein Fortified Foods, meat replacers and protein as flavour enhancer.

Feedback scores and evaluation result:

01-Dec-18 M Clinic					
Evaluation Results					
Category	Avg(Min-Max)Count				
Section 1 - Event administration/facilities	Rating Scale				
Overall satisfaction	6.6(4,7)10	1	Bad	2	Well below average
Quality of discussion	6.5(4,7)10	3	Below average	4	Average
Content of discussion	6.3(4,7)10	5	Good	6	Very Good
Rate of level to which it met your expectation	6.2(4,7)10	7	Excellent		
Comments and Suggestions					
It was a very good session & Interaction with Mr.Rao opened way for further interactions.					
Very helpful,got important insights regarding marketing.					
time was less than 30 mins-highly insufficient could we have mentor-mmentee interaction online before the actual meeting.					
I am happy to meet the mentor & get his directions to my specefic problem.					
It was wonderful to meet a great mix of mentors I had a wonderful networking opportunity.
